## SISKA RAPID EYELET MACHINE

### DESCRIPTION

This fully Automatic Machine punches, spaces, feeds & sets up to 300 eyelets per minute. It is the fastest sequential Eyelet Machine available in any market. A Shoe version of this machine is still available to the Footwear Industry.

This machine can be used alone as a Hole Puncher for round or oblong holes, and can be mounted to a table as shown in picture. Eyelet size can be easily interchanged thru changeover kits for an additional cost.

Spacing between eyelets is fully adjustable from 5/8" to 1.125" between Hole Centers. New, Used & Refurbished Models are available, call our sales department for more information 800-393-5381
